**Our Inspiration—Meet Thalia**
Thalia’s fight started February 2018 with what her family thought was the flu. She ended up being rushed to the hospital and admitted into the PICU the day before her 5th birthday for an extremely low hemoglobin level. After a bone marrow biopsy, she was diagnosed with pre-B cell acute lymphoblastic leukemia.

There were many ups and downs through her treatment, but no matter what she always seemed to stay positive with a big bright beautiful smile on her face reassuring everyone everything would be OK. Thalia is now in the maintenance phase of her treatment and dreams of becoming an oncologist when she grows up so she can help other kids with cancer.
